Subject: RE: Central Sands Dairy - Transfer of EPA Data with PII to Wisconsin Counties

Hi Matt and Brian!

I truly appreciate your help. Cheryl Burdett was the keeper of all of the data but I think now Jenny Wilson has been able to retrieve it from her.

Brian – how would you like to approach this? Could you and Jenny touch base? We have an intern – Litzi – who could provide assistance in the mornings this week. I welcome any ideas on moving forward.

Best wishes,
Heather

Heather and Brian:

Just talked with Brian and he can provide the know how to have your folks load the data into SCRIBE. He can also help with accessing SCRIBE. After talking to both of you it sounds like this can work. Brian can provide the knowledge, Heather the people power. Good thing is if there Brian can describe our experience so that we can do this more efficiently next time, like as Heather mentioned asking for EDD.

Let me know if this isn't working and we can try something else.

Thanks Jenny. Tom is on travel so I am acting for him today.

I think it's critical to point out how very little data we have to transfer – drinking water quality data from 13-18 private wells.

Matt – WD would greatly appreciate having these data transferred to Scribe so that we can share the water quality data – especially the nitrate sampling results – with the county health departments. This

is a time sensitive issue as we need to ensure that the residents with high nitrate results have access to alternate water. Please let me know if you need anything else.

Best wishes,
Heather

Enforcement confidential and deliberative. Do not release for FOIAs or discoveries.

Hi Tom and Heather,

Chuck said to give the residents' sampling data to the counties near Central Sands Dairy (CSD), we must put the data into Scribe according to an SOP that ORC has used for other projects. Superfund has experience using Scribe, but for Brian Cooper, the scientist in Superfund, to work on it, he needs my management to tell his manager (Matt Mankowski) that we are requesting that this is done. I am not sure if there are fees involved with having Brian do this work, I will let Matt address that, but I believe there may be fees for the Wisconsin State Lab to create an EDD file because they don't normally do this.

Cheryl, is there any money left in the funding you received for the CSD project? If yes, how much is there and may it be used to pay the Wisconsin State Lab to put the data in EDD format?

Going forward, Brian and I believe that the SOP ORC is using to transfer PII data needs to be re-evaluated because neither of us believe using Scribe is necessary for these purposes. We both think, given the current computer security situation, the SOP is outdated. If we are planning to do more sampling in Wisconsin, I think this needs to be looked at further so we don't waste Agency resources putting data into Scribe if we don't need to. Brian, if you have more to say or think I mischaracterized your thoughts, please say so.

Thank you,
Jenny
